this fall, a book will change the way we work. shop. vote. love. think. live.

A story about human invention, creativity, and the thirst to understand and predict human behavior in the digital age.

— dan ariely, author of predictably irrational

“Steve Baker puts his finger on perhaps the most important cultural trend today: the explosion of data about every aspect of our world and the rise of applied math gurus who know how to use it. Baker’s smart, readable style makes this a pleasure—it’s a must read for anyone who wants to understand life and business in the Google Age.”

— chris anderson, author of the long tail and editor in chief of wired
